

FY2015 CHNA&HIP Progress Report

Floyd County

Community Health Improvement Plan

GOAL	Strategies	Progress on Strategies
Decrease the percentage of Floyd County residents who are overweight/obese to 65% from baseline of 67%	quarterly newsletter available to Floyd County residents with information regarding healthy lifestyle choices.	In-service provided to staff in December, this information will then be used to help teach patients on health meal choices.
	team up with hospital staff (dietician) to promote healthy eating choices	ISU extension office is offering meal prep classes, referrals being made to this program.

GOAL	Strategies	Progress on Strategies
Poor parenting skills/Single Parent Families: Decrease the number of unmarried births to 70 from baseline of 78. Poor parenting skills will no longer be the top social issue facing Floyd County (per survey respondents) in 3-5 years. Baseline: of the 225 respondents 60.7% choose poor parenting skills as one of the top 3 health issues facing the county.	provide educational resources to unmarried mothers	CHNA-HIP UNMET NEEDS grant was awarded to Floyd County. The Overall goal of this grant is to promote Healthy Behaviors through, Safe, Stable, Nurturing Relationships and Environments for Children. Many groups throughout the county are collaborating to address barriers and gaps in Family-Planning Access. A community plan is also being developed for a sustainable approach.
	research what services are available to parents in the county	
	Work closer with service providers discovered in the above research
